Grade Level: Preschool - 3

Customer Reviews

I am a preschool teacher and bought this book to use in my classroom when I begin to teach the 5 senses. This is a great book for those who work with children and for those who have children. It is full of great ideas for lesson plans and for teaching your child the 5 senses. The illustrations and directions are easy to follow and make learning about the senses fun.

Some of the activities are a bit lame and, quite honestly, it's sad if you have to read a book to tell you to do some of this stuff. But there are some fun things, too. You probably can google activities and get all this and more for free on the internet.

For a parent who doesn't want to take the time to look for ideas on the internet, these are nice compact books with some good, but common ideas. I sent this to my computer phobic daughter for

her sons.

lots of good ideas for young kids. my son is excited about the experiments and likes the illustrations.
son is 4.

It has great indoor and outdoor activities, crafts, and explanations for young kids, with clear easy to follow instructions. Great purchase.

Wonderful book for parents, homeschooling moms and preschool teachers! Has great ideas and easy to do activities that help teach each of the 5 senses.

I bought this book for my 3 year old thinking it was a story for us to read together to teach his senses. Instead, this book is more of a book of ideas for pre-school teachers for lesson plans. It's a good idea, but not exactly what I was looking for.
