On The Same Day In March: A Tour Of The World's Weather

Synopsis

On the same day in March...Polar bears ride on Arctic ice. People in French cafes turn up their faces to the sun. Hailstones roll over Indian hillsides. Rain makes a river in Kenya. On the same day that it's icy cold in the Arctic, it's foggy in Louisiana, sunny in Barbados, and blowing wild winds called willy-willies in Australia. In this poetic exploration of longitude and weather, with bright and detailed paintings of seventeen different places, Marilyn Singer and Frané Lessac show us what's happening from the poles to the equator-- all on the same day in March. Top 10 Science Books for Children 2000 (Booklist) and Notable Children's Trade Books in the Field of Social Studies 2001, National Council for SS & Child. Book Council

Age Range: 4 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

As teacher education student, I have been on the lookout for quality children's literature. On the Same Day in March is one of the best books I have found for integrating different subjects. Lessons in Language Arts, Science, and Social Studies nearly write themselves as Singer uses a rich vocabulary to describe different types of weather, agriculture, geography and cultures all over the world! Although the book by itself lacks some of the "entertainment value" very young children demand, it is excellent for 2nd and 3rd graders.

This is a good book to cover geographical effects of seasons with young children but could have been much better had the author chosen a day in winter/summer rather than spring/fall. Also, some of the slang to specific regions (eg. willy-willies in Australian section) should have been defined. Overall though, it was a useful education book and the kids enjoyed the perky text and lively illustrations.

Wonder what someone halfway across the world is doing at the same time as you? This is a fascinating little book that will really make your kids think. A permanent addition to our library.

Really great book to explain the concept of the seasons and the hemispheres to young children. I'm going to use this for homeschooling my 5 yr-old.

I liked everything about it. My grandson, age 2 1/2, loves this book. It is full of color with beautiful illustrations. I recommend the book..

This book really helped my kids understand that not everyplace in the world was having the same weather, seasons, etc. that we were.
